

Engineering is our **business**
Project execution is our **expertise**

At MDS, we strive for excellence – our project management process is designed to drive projects from design to completion without compromising on quality, cost, or delivery.

RPM provides the framework to effectively execute any project. A scalable process, RPM can be applied to a wide range of budgets and varying complexity.

- End-to-end project management
- Efficiency without cutting corners
- Superior coordination and communication
- Predictive risk management
- Synergistic outcomes

It's in our DNA. Through extensive project experience and international collaboration over 30+ years, we have refined our project management process to be agile, risk-focused, and geared towards delivering complex projects.

METICULOUS PLANNING | RIGOROUS SCHEDULING | EXCEPTIONAL QUALITY

Precision

Vigilant attention to detail is a fundamental ingredient of a successful project. Our personnel are trained to focus on the details, establish facts, and avoid assumptions. We focus on the project details, so you can focus on your core business.

Accountability

Quick issue resolution, regular oversight by leadership, and clear expectations are the keys to RPM. A clearly defined information exchange process and a detailed responsibility matrix are tools we use to engage our team and drive efficiency.

Communication

The cornerstone of RPM is effective communication channels. We recognize that to be worthy of your trust, the relationship must have a foundation that demonstrates reliability, honesty, competency, and genuine care. A positive working relationship with all stakeholders is the most important aspect of any project.

THE POWER OF RPM

CLIENT SATISFACTION RATINGS

2017 • 2018

MDS's overall project performance
